Alkyd Finish

PRODUCT DESCRIPTION

A one pack, alkyd based, high visibility coating.

INTENDED USES

For application to marker buoys and as a safety marker on board ship. For use at Newbuilding, Maintenance & Repair or On Board Maintenance.

PRODUCT INFORMATION

Colour HXA127-Fluorescent Orange

Part B (Curing Agent) Not applicable

Volume Solids 54% ±2% (ISO 3233:1998)

Mix Ratio Not applicable

Typical Film Thickness 50 microns dry (93 microns wet)

Theoretical Coverage 10.80 m²/litre at 50 microns dft, allow appropriate loss factors

Method of Application Brush, Conventional Spray, Roller

Flash Point (Typical) Single Pack 39°C

Drying Information 5°C		10°C		25°C		35°C			
Touch Dry [ISO 9117/3:2010] 18 hrs		18 hrs		14 hrs		6 hrs		5 hrs	
Hard Dry [ISO 9117-1:2009]	72 hrs		50 hrs		24 hrs		24 hrs		
Note Note: Not applicable Overcoating Data - see limitation	าร		;	Substrate	Temperatu	ıre

Alkyd Finish

Consult your International Paint representative for the system best suited for the surfaces to be protected.

SURFACE PREPARATIONS

Use in accordance with the standard Worldwide Marine Specifications.

All surfaces to be coated should be clean, dry and free from contamination.

High pressure fresh water wash or fresh water wash, as appropriate, and remove all oil or grease, soluble contaminants and other foreign matter in accordance with SSPC-SP1 solvent cleaning.

NEWBUILDING/MAJOR REFURBISHMENT

Apply over a suitable, white undercoat, the surface of which must be clean and dry. Soluble salts should be removed by fresh water washing.

KInternational

Areas of breakdown, damage etc., should be prepared to the specified standard and patch primed prior to the application of Interlac 668.

REPAIR

Repair corroded areas with the specified anticorrosive scheme and apply Interlac 668 within the overcoating intervals specified for the primer (consult relevant primer data sheet).

Consult your International Paint representative for specific recommendations.

Alkyd Finish

APPLICATION

Mixing This material is a one pack coating and should always be mixed thoroughly with a power agitator before

application.

Thinner Not Recommended. Use International GTA004 only in exceptional circumstances (max 5% by volume). DO NOT

thin more than allowed by local environmental legislation.

Airless Spray Application by airless spray is not recommended.

Conventional Spray Suitable.

Use suitable proprietary equipment. Thinning may be required.

Brush Suitable.
Roller Suitable.

Cleaner International GTA004

Work Stoppages and Cleanup Thoroughly flush all equipment with International GTA004. All unused material should be stored in tightly closed

containers. Partially filled containers may show surface skinning and/or a viscosity increase of the material after

storage. Material should be filtered prior to use.

Welding In the event welding or flame cutting is performed on metal coated with this product, dust and fumes will be

emitted which will require the use of appropriate personal protective equipment and adequate local exhaust ventilation. In North America do so in accordance with instruction in ANSI/ASC Z49.1 "Safety in Welding and

Cutting."

SAFETY All work involving the application and use of this product should be performed in compliance with all

relevant national Health, Safety & Environmental standards and regulations.

Prior to use, obtain, consult and follow the Material Safety Data Sheet for this product concerning health and safety information. Read and follow all precautionary notices on the Material Safety Data Sheet and container labels. If you do not fully understand these warnings and instructions or if you can not strictly comply with them, do not use this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapour concentrations within safe limits and to protect against toxic or oxygen deficient hazards. Take precautions to avoid skin and eye contact (ie. gloves, goggles, face masks, barrier creams etc.) Actual safety measures are dependant on application methods

and work environment.

Alkyd Finish

LIMITATIONS

For maximum visibility, this product should be applied in 2 coats over Interlac 497 White.

Interlac 668 is not suitable for immersion and should not be used in alkaline conditions.

Overcoating information is given for guidance only and is subject to regional variation depending upon local climate and environmental conditions. Consult your local International Paint representative for specific recommendations. Apply in good weather. Temperature of the surface to be coated must be at least 3°C above the dew point. For optimum application properties bring the material to 21-27°C, unless specifically instructed otherwise, prior to mixing and application. Unmixed material (in closed containers) should be maintained in protected storage in accordance with information given in the STORAGE Section of this data sheet. Technical and application data herein is for the purpose of establishing a general guideline of the coating application procedures. Test performance results were obtained in a controlled laboratory environment and International Paint makes no claim that the exhibited published test results, or any other tests, accurately represent results found in all field environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection, verification of performance and use of the coating.

In the overcoating data section 'ext' = extended overcoating period. Please refer to our Marine Painting Guide -Definitions and Abbreviations available on our website.
